

DW Installation Instructions

Paxton Net2 DW Spectrum Plugin

Step 1: Download and Install the Paxton/DW Spectrum™ plugin.

1. Download the Paxton/DW Spectrum Plugin at www.digital-watchdog.com/Paxton.
2. Double-click on the installation package to begin installation and follow the installation wizard (see the installation video at www.digital-watchdog.com/page/videos, DW Spectrum Features playlist).

Step 2: Configure the Paxton Net2 Access Client in DW Spectrum.

1. Open the Paxton Net2 Access Client and log in.
2. Go the Options Menu and choose Camera Integration.
3. Press the Add button and choose your system name (DW Spectrum) from the list of camera servers.
4. In the Host Name field, enter the IP address or URL of your DW Spectrum system server.
5. In the Username field, enter your DW Spectrum username.
6. In the Password field, enter your DW Spectrum password.
7. Press Detect.
8. If your credentials and connection information are correct, you will see a list of cameras from the DW Spectrum system you are integrating with the Paxton Net2 Access System.
9. Press Apply and then OK.
10. In the Net2 client, go to the system tree and choose your target.
11. Select a door and then in the main viewing area of the Paxton Net2 client choose the Camera integration.
12. You should now see a list of cameras from the integrated system. Select the camera(s) you wish to associate with the door you've selected by checking the checkbox located next to each camera name.
13. Press Apply when done to complete the door-camera association.

Step 3: Viewing Event-Driven Video from DW Spectrum in the Paxton Net2 Client.

1. In the Paxton Net2 Client, move to the system tree and select your target.
2. Any event that has related video will now show a camera icon to the right of the details column.
3. Double click on the camera icon to activate a popup of the related video.
4. Users can now use the Paxton DW Spectrum Client to review, capture, and export video from the related event.
