

DW Spot™ Monitoring Module

Digital Watchdog's new DW Spot™ Monitoring Module lets you directly view up to four HD cameras at a time without connecting to them through a PC or server. The DW-HDSPOTMOD is easy to use, automatically searching the network and identifying an unlimited number of ONVIF conformant IP cameras, VMAX AHD Core™ DVRs or VMAX IP Plus™ NVRs for local monitoring. The DW Spot™ Monitoring Module is ideal for providing public views in retail and office environments, as well as providing camera views for security personnel. It even allows you to post a scrolling text message of any length over the video! The DW Spot™ Monitoring Module can be configured remotely via a web browser, includes HD and VGA outputs, a USB mouse and is backed by Digital Watchdog's unbeatable 5 year warranty.
