For Immediate Release

New DW Spectrum® IPVMS v3.1 is Now Available

Digital Watchdog's Flagship Video Management Software is Better than Ever with More Cloud Features and Capabilities

DW Spectrum® IPVMS v3.1 – Built for Users™

Cerritos, CA (December 5, 2017) – [Digital Watchdog® \(DW™\)](http://www.digital-watchdog.com), the industry leader in digital recorders, surveillance cameras and related management software, Digital Watchdog introduces the latest version of DW Spectrum® IP video management (v3.1) . This release provides powerful new tools to enhance the end users experience while making DW Spectrum® systems even easier for system administrators.

The DW Spectrum® v3.1 release continues to develop DW Cloud™ with an all new Cloud web client to view and review video right in the AWS powered DW Cloud™ portal, allowing users video access in any web browser. The all new cloud data proxy capability will ensure trusted connectivity to each site, eliminating the need for any port forwarding.

Digital Watchdog Press Release

With DW Spectrum® v3.1, administrators can now create soft trigger overlay buttons to instantly trigger system actions right in each video panel. The all new Showreel function allows administrators to create timed viewing sequences using any resource - cameras, layouts, web pages, offline files, and even server health monitoring. Additionally, administrators can force acknowledgement and bookmark by operators before a notification disappears in desktop client with a new system action.

Multicast stream support and H.265 support adds connectivity options to the 1000's of supported devices in DW Spectrum v3.1.

Finally, in DW Spectrum® v3.1 the all new API generator makes it even easier for developers to connect 3rd party systems to DW Spectrum®. This new feature found in the web client admin interface under the 'For Developers' tab makes creating HTTP Generic Events and API calls seamless.

The DW Spectrum® IPVMS is accessed with the freely distributed DW Spectrum® client software (Windows/Linux/Mac), the DW Spectrum® IPVMS can be accessed with the web client from all leading web browsers (Google Chrome, Firefox, Internet Explorer, Safari and Opera), as well as the free DW Spectrum mobile app for iOS and Android devices. The VMS software is included with pre-configured DW Blackjack NVR servers or it can be installed on third-party Windows or Ubuntu Linux-based systems.

The DW Spectrum® IPVMS updates automatically in systems where previous versions are already installed. Click [here](#) to view the product's page on our website or go to www.digital-watchdog.com and search for DW Spectrum.
