

FOR IMMEDIATE RELEASE

Digital Watchdog® DW Spectrum™ IP VMS Now Integrated with IDenticard®

DW Spectrum™ IP VMS v2.3.
More than ever... Built for Users

Cerritos, CA (July 24, 2015) – [Digital Watchdog](#) (DW™), the industry leader in digital recorders, surveillance cameras and related management software, is proud to announce the integration of IDenticard®'s PremiSys™ access control system with our DW Spectrum™ IP VMS v2.3

PremiSys is an access control solution from IDenticard designed to make it easier than ever to manage and monitor facility access. Scalable to be used at facilities both large and small, PremiSys can be used to restrict or grant access to doors, lock down facilities with the press of a button and more.

The integrated system ties DW Spectrum's robust video management system to IDenticard's PremiSys access control system. Users of the integrated system will be able

- To compare current and past states during alarm conditions by displaying live and recorded video side-by-side through the PremiSys interface.
- Events and recordings can be linked and then called up via the PremiSys user interface, making it easy for system users to investigate incidents as needed.
- Identify camera locations on a dynamic map and click the icon to instantly view live video within PremiSys.
- View multiple camera angles by selecting from a list of all cameras associated with specific doors within PremiSys.

“DW Spectrum's built in API allows us to support innovation by partners such as IDenticard,” said Patrick Kelly Director of IP at Digital Watchdog. “With our open platform we are able to work with partners to offer integrated video that operate seamlessly, to deliver a best-in-class integrated security solution. We are excited to have IDenticard as a technology partner.”

Digital Watchdog Press Release

The Digital Watchdog video plug-in is available now, via the IDenticard Partner Resource Center under the PremiSys "Plug-Ins" tab. One license, part # PREM-DIGITALWATCHD, from IDenticard is required per server.
