

For Immediate Release

DW[®] Announces DW Spectrum[®] IPVMS Integration with Galaxy Control Systems[®]

DW Spectrum[®] IPVMS v3.2 – Built for Users[™]

Cerritos, CA (September 23, 2018) – DW[®], the industry leader in digital recorders, surveillance cameras and related management software, is pleased to announce the release of the DW Spectrum[®] IPVMS integration with Galaxy's System Galaxy access control. The integration will be available with the System Galaxy v11.0 update, and officially launched at the 2018 ASIS/GSX show.

The new integration offers users the power to combine both DW Spectrum[®] IPVMS and System Galaxy platforms for a complete, full features and comprehensive solution. The new System Galaxy version 11 offers support for DW Spectrum[®] with advanced plug-in-based

video system capabilities. The GS can now import camera's settings and names from the DW Spectrum® interface itself.

“We are excited to have completed this integration project with Digital Watchdog and look forward to working with the many mutual integrators that use our combined products.” said Rick Caruthers, Executive Vice President at Galaxy. “Having this level of cooperation between our companies will certainly result in an increase in the number of potential new customers, many of which have been asking for this partnership.”

“Adding Galaxy Control Systems to the DW Spectrum partner program provides our channel partners another fantastic option for enterprise-class access control.” says Patrick Kelly, Director of IP Video Solutions. “Fully utilizing DW Spectrum's open architecture platform, this integration provides greatly expanded functionality for a complete real-time security management solution.”

The DW Spectrum® IPVMS is accessed with the freely distributed DW Spectrum® client software (Windows®/Linux®/Mac®), the DW Spectrum® IPVMS can be accessed with the web client from all leading web browsers (Google® Chrome, Firefox®, Internet Explorer®, Safari® and Opera®), as well as the free DW Spectrum® mobile app for iOS and Android devices. The VMS software is included with pre-configured DW Blackjack® NVR servers or it can be installed on third-party Windows® or Ubuntu® Linux-based systems. DW Cloud, a service powered by AWS is included to enable simple remote connectivity, streaming and management of one or an unlimited number of DW Spectrum IPVM Systems.

System Galaxy is a complete, enterprise-class access control and security management solution. Cloud Concierge is a powerful suite of cloud-based access control services offered by Galaxy Control Systems that provides a range of capabilities for real-time monitoring, management, and control from anywhere via PC, tablet, or mobile phone.
