# IVA Intelligent Video Analytics

**MEGAPIX® IVA/IVA+**

IP cameras with Intelligent Video Analytics

## Powerful Intelligent Video Analytics (IVA) detecting and classifying people and objects in real-time.

The analysis of video content by the IVA engine provides users the ability to automatically analyze video, detect and determine events at the edge. Processing the raw video data in the camera itself, near the source, significantly reduces bandwidth consumption, increases accuracy and reduces response time. Additional capabilities are available by adding IVA+.
