

For Immediate Release

DW[®] Announces DW Spectrum[®] IPVMS and Prodatakey[™] Cloud-based Access Control Partnership

DW Spectrum[®] IPVMS v3.2 – Built for Users[™]

Cerritos, CA (March 26, 2019) – DW[®] Complete Surveillance Solutions, the industry leader in digital recorders, surveillance cameras and related management software, is pleased to announce that our flagship software, DW Spectrum[®] IPVMS is now integrated with Prodatakey[™] (PDK[™]). PDK[™], an innovator of cloud-based networked and wireless access control products and services, seamlessly integrates PDK's cloud access control technology into the DW Spectrum[®] IPVMS interface.

“We are very excited to be adding PDK as a DW Spectrum[®] technology partner. This is a solution that delivers,” said Patrick Kelly, Director of IP Video Solutions, DW[®]. “Our mutual partners have been very eager to combine DW Spectrum's ease of video handling with PDK's effortless cloud access control. Users will be able to review all their PDK event data within DW Spectrum's dynamic interface. Popping up video layouts, moving PTZs to presets and enabling notifications of events in PDK are effortless with this integration.”

“ProdataKey’s laser focus on delivering the ultimate customer experience, which combines all the advantages of a 100% cloud-based platform, the convenience, flexibility and affordability of wireless connectivity, and robust access control management tools, is the perfect complement to DW Spectrum’s video management solutions,” said Evan Tree, CEO of ProdataKey. “The seamless enablement of video verification related to PDK access events, via the DW platform, is an extension of our commitment to deliver powerful security that is easy-to use and fully accessible from wherever our customers want control – in this case, from within the DW Spectrum client interface as part of a complete, integrated system. In addition, our unique licensing structure, minimized hardware costs due to cloud architecture, and simplified installation options that make use of wireless technology, contribute to an extremely competitive total-cost-of-ownership that aligns perfectly with DW’s value-driven offerings.”

DW Spectrum® IPVMS is accessed with the freely distributed DW Spectrum® client software (Windows®/Linux®/Mac®), the DW Cloud™ web client for all leading web browsers (Google® Chrome, Firefox®, Internet Explorer®, Safari® and Opera®), as well as with the free DW Spectrum® mobile app for iOS® and Android® devices. The server software is included with pre-configured DW Blackjack® NVR servers or it can be installed on third-party Windows® or Ubuntu® Linux-based systems.

The DW Spectrum® IPVMS updates automatically in systems where previous v3 software is already installed. Click [here](#) to download the software from the product page on our website or go to www.digital-watchdog.com and search for DW Spectrum®.

ABOUT DW®

DW® empowers our customers as the industry-leading single source of value-driven complete solutions for all video surveillance applications (Universal HD over Coax® / hybrid / IP enterprise), focusing on ease of use and ROI. DW® products offer technologically-advanced features including multi-sensor HD cameras at real-time 30fps, Star-Light™ super low light technology, WDR, Smart DNR™ and Smart IR™. Complete IP megapixel surveillance solutions include single- and multi-sensor MEGApix® cameras and edge recording systems, Blackjack® NVRs and NAS devices, DW Spectrum® IPVMS for server, mobile and on-camera control. Complete Universal HD over Coax® surveillance solutions include single- and multi-sensor

STAR-LIGHT™ Universal HD over Coax® cameras, VMAX® Universal HD over Coax® DVRs and mobile management applications.

ABOUT PRODATAKEY

ProdataKey (PDK) is a leading innovator of cloud-based access control products and services. The company's pdkio cloud platform allows for complete system management and control through any web connected device, with the flexibility of networked, PoE, and its WiMACTM (Wireless Mesh Access Control) technology that communicates wirelessly between doors for up to one mile, saving up to 75% over traditional wired systems.
