

For Immediate Release

DW® DMP® Integrated Cameras Now Available

MEGApix® cameras, now compatible with DMP security systems, deliver instant video verification in crystal-clear resolution

DW's 2.1MP IP Cameras and DMP Virtual Keyboard Access Integration

Cerritos, CA (November 5, 2018) – [DW®](#), the industry leader in digital recorders, surveillance cameras and related management software, is pleased to announce the integration with Digital Monitoring Products (DMP®). This partnership will allow for collaboration between the two companies' products, development and further integration. This partnership gives DMP a high-performance surveillance solution with crystal-clear 2.1-megapixel 1080p resolution images.

“We are very pleased to be partnering with a cutting-edge solution provider like DMP” said Patrick Kelly, Director of IP video solutions at Digital Watchdog. “This integration was really driven by the demand of our mutual channel partners to deliver actionable life safety and business intelligence with the associated high-quality video. The DMP Series is a valuable addition to our MEGApix lineup. “

Built on the high-quality imaging, resolution and video processing functions found in DW's professional grade MEGApix® camera line, DW's DMP series provides clients significant enhancements in video verification. During an alarm situation, high quality video verification immediately delivers video from the premises to the system owner via their Virtual Keypad™ app. This enables instant assessment of the situation for the appropriate response. As a result, police, fire departments and first responders are confident that they are dispatched to a "real" alarm. DW's MEGApix® visual verification can also prevent users from being assessed heavy fines for false alarms.

Digital Watchdog Press Release

“We are very pleased to develop this partnership,” said Brad Tucker, DMP’s director of Product Management & Support. “Digital Watchdog is a respected leader in the surveillance industry with video technology that is very popular among many dealers.”

High definition video is sent with every alarm notification to a central monitoring station. As a result, operators can view the footage right away and determine whether the alarm is valid and worthy of dispatch. “When there is an alarm, customers need the necessary information to make the right decisions immediately,” Tucker adds. “This integration allows us to provide these functions for dealers that use the Digital Watchdog cameras, as well as use those cameras in our Virtual Keypad app for viewing live and recorded video.”

DW’s DMP series includes the 2.1MP DWC-MB721M4TIRDMP bullet camera with 4.0mm fixed lens and the 2.1MP DWC-MF21M4TIRDMP ultra low-profile vandal dome with 4.0mm fixed lens, both available now. MEGApix® IP cameras deliver crystal-clear 2.1 Megapixel 1080p resolution images with image features such as Smart IR™, True Wide Dynamic Range (WDR) and 3D DNR for high quality video verification in any lighting environments. Both companies plan to expand the integration to additional cameras in the near future.

ABOUT DW

DW® empowers our customers as the industry-leading single source of value-driven complete solutions for all video surveillance applications (HD Coax™ / hybrid / IP enterprise), focusing on ease of use and ROI. DW® products offer technologically-advanced features including multi-sensor HD cameras at real-time 30fps, Star-Light™ super low light technology, WDR, Smart DNR™ and Smart IR™.
