Re: DW Spectrum® IPVMS v3.2 Software Update

DW Spectrum® IPVMS v3.2 Software Update  

New Software Version: v3.2  
Previous Software Version: v3.1  
Release Date: 7/10/2018

New Features:

• In-camera analytics support - Users can now use in-camera analytics events when creating rules in the rules engine for DW®, Axis and Hikvision cameras.
• Enhanced export - Completely redesigned video export interface with the ability to burn in watermark logos during the export process.
• Custom camera logical ID - Users can assign a custom logical ID in the camera settings dialog to create an alias for the camera ID in server API calls.
• Archive integrity check - Users will receive a notification when viewing any archive which has been modified manually (files moved or deleted in storage archive).
• Export bookmarks from timeline - a button has been added to allow users to export bookmarks directly from the timeline.
• Contextual help - A fully revamped version of the help manual.
• Bitrate throttling - Added the ability to change image resolution and adjust bitrate (fine tuning) for Axis, Acti, Hikvision, and ONVIF devices.

POTENTIAL ISSUES (please pay attention while testing):

- UI elements issues.
- Cloud connection issues.
KNOWN LIMITATIONS:

- **DW Analytics.**
  * Events do not work if VCA and MD events are enabled simultaneously.
  * Need to wait for two minutes after an event is enabled on the camera’s web page.
  * Events work for all zones but do not work for a specific zone.
  * Events stop working if camera CPU is more than 80%.

- **DW® DWC-MTT Analytics:**
  * Some events do not work simultaneously on DWC-MTT series cameras.
  * Camera sends spurious notifications for some events when settings are changed.

- **Axis analytics.** If Axis people counter is enabled on Axis camera, auto and manual discovery do not work in the software. Camera issue.

- Recorded G.726 audio with 16 Kbit bitrate is not played in archive.

- Export H.265 to .avi is not supported.
