Video Management Anywhere, Anytime.

Apps for every operating system. **Cloud enabled.**

DW Spectrum® IPVMS supports all major operating systems with the ability to link any system to DW Cloud™ for fast, reliable remote access.

Automated. Intuitive. **Built for Users.**

Installs in seconds, configures in minutes. Instantly usable for novices, operators, integrators, or developers.

**Auto-discover devices** from hundreds of manufacturers.

Discover and manage thousands of compatible video, audio and I/O devices. Set up a new system or replace any existing VMS in minutes.

Open for developers. **Integrate anything.**

With an open Restful API, a suite of SDK’s, and integrator-friendly tools like a built-in API generator DW Spectrum® IPVMS users can quickly integrate any 3rd party device or system.
DW Spectrum® IPVMS is an endlessly customizable IP Video Management platform that gives users the ability to create tailored networked video solutions for any type of project, for use by anyone, on any device.

1. Open architecture / cross platform.

   - **Open Architecture**
     - Now with DW Cloud™, connect from anywhere to share access instantly.
     - Now with even more device support.
     - Support of thousands of devices including cameras, encoders and I/O modules from leading manufacturers.
     - Support cameras at every resolution.
     - Built-in API allowing managed video to be accessed and reviewed by any willing 3rd party device.

   - **Cross Platform**
     - DW Spectrum’s recording engine runs on Windows® and Linux® Operating Systems.
     - Client software is Windows®, Linux® or Mac® compatible.
     - Mobile apps are iOS® and Android® compatible.
     - Web client is compatible with Google Chrome®, Firefox®, Safari® and Internet Explorer®.

2. Interface is dramatically easier to use.

   - **Highly refined GUI**
     - **Viewing Video**
       - Seamless transitions
       - Customizable camera layouts
       - Zoom, create regions of interest and enhance images
     - **Searching Video**
       - Fastest video search in the industry
       - Users can bookmark specific video segments
     - **Downloading Video**
       - Multiple download options
       - Storage backup
     - **System Programming**
       - Intelligent high definition multi-streaming video management with no user programming required
       - Server and system programming from a single interface
     - **Advanced Features**
       - Interactive mapping, alarms, events/notifications, universal fisheye de-warping from a single interface
       - External alarm events can be delivered right from the IP camera or via network I/O modules
## Enterprise features are standard.

- **Custom User Role Management**: create custom roles and share groups of hardware and layouts.
- **Multi-Server and Centralized Management**.
- **Health Monitor**: provides real-time insight of camera and server status.
- **Video Storage Analytic**: insight into storage requirements each camera is using in real-time and forecasts the impact of additional storage.
- **Minimize Video Recording Loss**: includes failover to protect video recordings from hardware failures and network interruptions.
- **LDAP / Active Directory** integration for enterprise-wide user management is standard.
- **Video Wall** users can create and remotely manage remote monitors with just a few clicks.

## Part of a complete end-to-end IP solution.

Although DW Spectrum® IPVMS is open to be deployed on a vast number of solutions. It is also part of DW’s compete end-to-end IP solution, with Blackjack® servers or VMAX® IP Plus™ NVRs and MEGApix® IP cameras.

## Lifetime upgrades included/no annual agreements.

While other companies require annual maintenance agreements, DW Spectrum® IPVMS system upgrades are always available free of charge.

## Scalable from one to thousands of devices.

The unified user experience for applications requiring one or thousands of cameras, it is deployed at thousands of locations worldwide, making DW Spectrum® the industry’s fastest growing VMS on the market today.

## You choose your devices.

DW Spectrum® has applications for all major operating systems so our users are not limited by what device or operating system they choose to use on their desktops, mobile devices, rack mount servers, or even low-powered embedded devices.

- **SHOW REEL**: Fully customizable timed viewing tour of any GRID media
DW Cloud™ Simplifies Everything.

The DW Cloud™ service makes connecting to and managing DW Spectrum® IPVMS system(s) simple. Set up in seconds. Connect from anywhere. Share with an unlimited number of users.

Quick setup
1. Create a DW Cloud™ account
2. Link your system to DW Cloud™
3. Connect, view and manage video anywhere, anytime.

Browser based user interface
- Manage users
- View live or recorded video
- Quickly connect to any system

Connect. View. Manage. Scale.

DW Cloud™ is a public cloud application hosted on Amazon AWS that enables simple remote connectivity, streaming and management of one or an unlimited number of DW Spectrum® IPVMS systems.

SUPPORTED BROWSERS:
- chrome
- Microsoft Edge
- Opera
- Firefox
- Safari

DW CLOUD™ SERVICES

CLOUD CONNECT

Connect any DW Spectrum® IPVMS System to DW Cloud™ for simple remote connectivity from anywhere using NAT Traversal and Cloud Data Proxy technology.

Add an unlimited number of users to a single DW Cloud™ system.

Share access to your DW Cloud™ system in seconds using only email addresses.

Create custom roles to simply and quickly assign access to multiple DW Cloud™ connected systems.

DEVELOPER TOOLS

CLOUD API: AVAILABLE UPON REQUEST

HOW IT WORKS

1. Recorders store information and provide search capabilities as before.

2. Connect to DW Cloud™.

   DW Cloud™ gets IP address from the Blackjack® server.

4. DW Cloud™ gives IP addresses to client device to allow direct connection between Blackjack® server and DW Spectrum® Remote Client.

5. NAT Traversal bypasses port forwarding to provide a direct peer-to-peer connection.

6. If a firewall prevents peer-to-peer connection, a recorder-client connection is relayed via DW Cloud™.

DW CLOUD™ BROWSER & DEVICES INTERFACE

# OF CONNECTED SYSTEMS: UNLIMITED

# OF USERS: UNLIMITED

DW CLOUD™ FEATURES

CONNECTIVITY

NAT TRAVERSAL: Connect directly to proxied Blackjack® servers

CLOUD DATA PROXY: Connect via AWS cloud proxy service

INTERFACE TABS

SYSTEMS: View connected system tiles

SETTINGS: View users, rename systems, disconnect systems

VIEW: USE DW Cloud™ to view live or recorded video

SECURITY

SECURE PASSWORD RECOVERY: Via email

HTTPS: Open SSL, encrypted server/client/cloud connections

EMAIL: (transport layer security)

PASSWORDS: Complex, multi-level hash

HOW IT WORKS

1. Recorders store information and provide search capabilities as before.

2. Connect to DW Cloud™.

   DW Cloud™ gets IP address from the Blackjack® server.

4. DW Cloud™ gives IP addresses to client device to allow direct connection between Blackjack® server and DW Spectrum® Remote Client.

5. NAT Traversal bypasses port forwarding to provide a direct peer-to-peer connection.

6. If a firewall prevents peer-to-peer connection, a recorder-client connection is relayed via DW Cloud™.
Smart phone or tablet. Smart video.

DW Spectrum® Mobile for iOS® and Android® smartphones and tablets provides fast, dependable mobile access to any DW Spectrum® IPVMS system.

DW Spectrum® Mobile - with a custom developed media player - is a low-latency, user-friendly mobile application for iOS and Android devices that allows users to connect to, view, search, and control IP cameras over wifi or data networks.
